

AMENDMENTS TO THE SPECIFICATION:

Please add the following new paragraph after p. 1, l. 25 of the Substitute Specification:

BRIEF DESCRIPTION OF THE DRAWING

Fig. 1 shows an illustration of enabling useful data for an area which is defined by a user by defining a center point and a radius of a circular region.

Please replace the paragraph beginning on p. 2, l. 4 of the Substitute Specification with the following amended paragraph:

If the intra-device license management is supplemented by the described geometric consideration, it is possible to enable a defined radius around a position as a data area, as shown in Fig. 1. This radius is not limited to any political hierarchies within a data set, which is regarded as the content of a data carrier for the selected area.
